Second-year Mathematics student focused on product design and management, with a growing interest in AI. Background includes AI model evaluation and end-to-end product development, with an emphasis on usability and responsible design.

Education

National University of Singapore (NUS)

Expected May 2029

B.S. in Mathematics (Special Programme in Mathematics)

Singapore

NUS College (Honours Program)

- GPA: 4.80/5.00
- Relevant Coursework: Linear Algebra, Probability, Calculus, Multivariable Calculus, Combinatorics and Graphs, Analysis, Programming Methodology

Industry Experience

SenseTime Technology

June - July 2026

Multimodal Model Evaluation Intern

Shanghai, China

- Built an automated framework to generate 150-200 retrieval-augmented generation (RAG) test sets across text-based and multimodal formats (PDFs, images, image-captions, etc.)
- Designed RAG evaluation benchmarks spanning text generation, multimodal, and multi-turn conversation tasks
- Ran evaluation across multiple task types, including multimodal question-answering, text-to-speech (TTS), and image generation

Xinpu Technology

July 2024

R&D Intern

Shanghai, China

- Analyzed and visualized RF power amplifier chip performance data across multiple frequency bands and output power levels for mobile phone applications, using Python (Pandas, NumPy, Matplotlib)
- Supported meetings with financing partners by helping communicate technical chip performance data to non-technical investors

Research Experience

NUS UROPS

May 2026 - present

AI Alignment Research (Supervised by Assoc. Prof. Tong Xin)

Singapore

- Investigating temporal awareness failures in Large Language Models, where models incorrectly reference past messages
- Proposing and evaluating potential methods, including timestamp attachment, dynamic conversation summarization, and positional encoding modifications – to improve temporal grounding in multi-turn dialogue

Leadership / Extracurricular Activities

NUS Mathematics Society

June 2026 - present

Project Executive

Singapore

- Chief organizer of the NUS Arithmetic Contest, an annual inter-school event recruiting Junior College and undergraduate participants across Singapore
- Supporting the execution of major society events, including the Student Life Fair and Annual General Meeting

Cyanhills Education

April 2026 - present

IB Physics Tutor

Remote

- Raised a student's IB physics performance from a 4 to a 6 (on the 1-7 scale) through structured one-on-one tutoring
- Designed target problem sets mapped to the official IB assessment criteria to improve analytical speed and accuracy

The Collective Faire

January - April 2026

EXCO (core team)

Singapore

- Planned event space layout for The Collective Faire, NUS College's largest community market with close to 50 booths
- Contacted and coordinated alumni and student participants, designed publicity materials, and facilitated event execution on the final day

Skills & Interests

Languages: Fluent in English and Mandarin (spoken and written)**Programming Languages:** Python, JavaScript, C**AI & Product:** LLM APIs (Gemini, Qwen, Claude), AI model evaluation, Hermes (agent framework), Supabase, GitHub**Other Technical & Tools:** Microsoft Office Suite (incl. Excel), basic Photoshop**Interpersonal:** Public speaking & debate, communication, critical thinking, teamwork**Interests:** Photography, reading, baking
